Finance at Dauphine

The ability to approach complex problems

A demand emanating from a changing economic and financial world

A major player for finance refoundation

A recognized expertise

A thematic richness and diversity of approaches

The House of Finance

Our strategy ...

The House of Finance is part of the university strategic plan for two major axes:

- Develop the cross-disciplinary research
- Increase the international exposure of the University

Our view: Enhance the particularity of Dauphine in the field of finance to strengthen its position through a multi-disciplinary approach

... in order to ...

Increase visibility for all activities in the field of Finance and openness to international

Attract best researchers and students

Build a strong partnership around the House of finance and the University

Create a force for negotiating research contracts and enhance interdisciplinary research

Position Dauphine as an international leading university in finance

The House of finance is a virtual entity, that exists across a communication strategy (**a brand, a website**) and transversal programs ;
The implementation is based on a constructive approach using existing resources

The House of Finance is:

- **Flexible** – Co-design of research projects with academic and business partners

- **Innovative** – Adapted to specific needs of financial companies (professional training and research)

- **Reactive** – Participate to the current debates on the role of Finance in the economy

- **Transverse** – Develop projects between teaching and research entities in Finance

Our targets are:

Students

Financial Companies

Decision makers

Practitioners (executive MBA)

Academic network

Media
